

Galactic History and Soul Status

BY APRIL MYRICK

I am April from the solar system Alpha Centauri, which is in the Centaurus constellation, in our Milky Way galaxy. The suns/stars in that solar system are called Alpha and Beta Centauri; a third sun has been discovered farther away called Proxima, and there are planets around these suns. Alpha Centauri is the closest star to Earth, just 4.37 light-years away, which equals about 26 trillion miles. There are 100 million stars in our Milky Way galaxy, and it is said that there are more galaxies in our universe than grains of sand on Earth. The Lawrence Berkeley National Laboratory writes that Alpha Centauri is special, not only because it is the closest stellar system to our Sun, but also because it is one of the few systems in our galaxy that may offer terrestrial life conditions (in the third dimension).

I lived and worked in the Alpha Centauri system on the fifth and sixth dimensions before I came to Earth. A fleet of Alpha and Beta Centaurians were assigned to protect Earth and to bring pure light at the time of the birth of Christ; we have been here since. We came in our multidimensional ships, and the ships are in this system protecting the planet. I am often consciously in our ships, both out-of-body and in the dreamtime, removing unwanted and nonspiritual technologies from Earth's outer grid, as directed by our Creator.

Lightworkers all have a higher dimensional job, which is usually reflected in the physical realm. We are here for two reasons: to assist Earth and to refine our souls. The earthly type of spiritual work that I am trained for is not the usual astrology, numerology, channeling, or healing work, even though I have taught Reiki. My main training for over forty years was designed to assist souls in soul clearing, recoding, and protection. In the third century, St. Gregory of Nyssa wrote that it is absolutely necessary for the soul to be purified in this life or after. In the early 1900s, the Theosophical writers channeled for us much about the soul's path of initiation; the initiations of the soul indicate the soul status.

Analysis and detailed prayer requests are my specialty. The analysis of a soul's interference and blocks is done with the assistance of the record keepers in our Creator's Hall of Records. The corrections are made by the soul's high self, or I Am presence, plus the angelic heavenly hosts and the forces of light — but only after a detailed and specific prayer request is created with the correct numbers and percentages. The request is then presented to the Creator of all, and we process this energy work that is occurring on request. The results are amazing! Permanent shields of light are reinstated from

the far past, and all compromising guides and influences are removed and sent to follow their natural progressive spiritual paths. Implants and unwanted technologies are removed from the soul and subtle bodies. Negative limitations and dark contracts are broken and removed from all records, as well as from the soul's bodies, chakras, and energy fields.

The fun part of the work is the soul's recoding to the Creator's inner planes temples. These are the temples of Love, Light, Truth, Power, Abundance, Divine Male/Female, Divine Union, and the Mission Child Temple, plus the unification of all temples with the love codes. We facilitate the activation of the divine Earth blueprint in each soul and the recoding of the ten-room blueprint house. We analyze and recode the damaged wholeness matrix, relationship matrix, group matrix, and connecting group matrix for each soul. Some results of soul clearing for me have been:

- good health
- prosperity
- increased clarity and discernment
- spiritual gifts activated
- and memory of my galactic history.

This work is now so fast that it is often instantaneous. Our blocks come up in layers to remove, and we are clearing much that we needed to clear before we came to this third-dimensional Earth. We had many experiences and incarnations in the universe before we arrived here; they were not all good, but we carry all of them in our souls. To reach Christ consciousness, we must purify energies in our multidimensional experiences that were not of highest divine love. We must clear interference that is still holding us back as well. In reading the book *Bringers of the Dawn*, we got a picture of the Reptilian interference, but that is not all we have to remove. There are many forces to remove and mistakes to overcome on multiple timelines, dimensions, and realities. We can definitely rework the past and affect the present and future!

At least two of the facilitators in the Sedona Journal have positively assisted me in the past. One calculated my numerology chart in the '70s, which indicated my birth numbers to be 4/22, and the other looked at my astrology chart in the early '90s and explained more about my Taurus Sun, Gemini rising, Cancer Moon, and Pisces midheaven. All I've studied has brought my work together into a Powerful Package of Light to Share with You.
